

Tolomeo Sospensione Decentrata Satin

Your dining table is not positioned under the ceiling outlet? No problem - the flexible arm lets you move the aluminium coloured silken shade of this unique ceiling lamp to exactly where you need it. The adjustable arm with a sophisticated spring balance system and the lamp head which rotates in all directions provide maximum flexibility. The possible radius from the ceiling outlet to the middle of the table is 1.5m in rooms with ceiling heights of up to 2.4m. In rooms with ceilings up to 2.8m, this radius reduces to 1m. The aluminium shade directs the light just where it is needed. And that is not all: when the light is turned on, the aluminium coloured silken shade turns white and has a pleasant, soft glow. Ideal for rectangular tables and round dining tables with diameters of up to 160cm. When the luminaire is switched off, the silken shade is an aluminium grey colour; when it is switched on, the shade glows white.
